

Panel discussion - "Does it need synthetic biology for a sustainable bioeconomy?"

Sonntag, 28. August 2022 11:45 (1 Stunde)

"Does it need synthetic biology for a sustainable bioeconomy?"

In the iGEM world, synthetic biology is everything! But how much can it really contribute to a sustainable world? In our panel discussion, we want to discuss with experts from different disciplines the relevance of synthetic biology for the bioeconomy and the associated opportunities and risks that could influence a transformation to a sustainable bioeconomy.
